Scenario for General Fund Only ..... 32
Conclusion ..... 37

## OVERVIEW

A long term financial plan (LTFP) is one of the three key Resourcing Strategies required by the NSW Integrated Planning \& Reporting legislation. Local government operations are vital to its community, and it is important that stakeholders can understand the financial implications arising from its Community Strategic Plan, Delivery Program and annual Operational Plan.

The Integrated Planning and Reporting Guidelines issued by the Office of Local Government guide preparation of the LTFP for local government in NSW.

The LTFP includes:

- projected income and expenditure
- statement of financial position
- cash flow statement
- planning assumptions used to develop the plan
- sensitivity analysis - highlight factors most likely to affect the plan
- financial modelling for different scenarios
- methods of monitoring financial performance

The LTFP contains a core set of assumptions. These assumptions are based on CPI forecasts, interest rate expectations, employee award increases, loan repayment schedules and other special income and costs.

Carrathool Shire Council's Long Term Financial Plan covers the period 2023/24 to 2032/33. It recognises its current and future financial capacity to continue delivering high quality services, facilities and infrastructure to the community while commencing new initiatives and projects to achieve the goals set down in its Community Strategic Plan.

Financial planning over a ten-year time horizon is difficult and obviously relies on a variety of assumptions that will undoubtedly change during this period. The LTFP is therefore closely monitored, and regularly revised, to reflect these changing circumstances.

A number of scenarios were considered during the development of the LTFP. Given the remote location of Carrathool Shire and the lack of alternative revenue streams available as future sources of funding, the scenario outlined in more detail for consideration relies on variations to rating income.

The aims of Carrathool Shire Council's Long Term Financial Plan are to:

- Set out the assumptions upon which Council's financial plans and budgets have been structured.
- Identify some key performance indicators upon which Council can benchmark its financial performance.
- Establish a framework so that the impact of future policy decisions can be identified.
- Evaluate the impact of future scenarios upon Council's financial position.

- Provide a basis for future informed decision making.
- Identify issues which impact upon the financial sustainability of Council including know opportunities and threats.
- Achieve a minimum of a balanced budget on a funding basis over time acknowledging that minimum service delivery and urgent asset renewal are the main priorities in situations where working fund deficits may be forecast.
- Where necessary, seek to reduce working fund deficits by exploring opportunities to reduce operating costs in real terms over time or alternately expand the revenue base of Council.

## Current Financial Position

Carrathool Shire Council faces a number of challenges in terms of financial sustainability. Our Council administers a total land area of about 19,000 square kilometres with a population of approximately 2,719 people.

According to the Australian Bureau of Statistics, the population of our local government area is expected to decline by $9.1 \%$ to 2,500 people by 2041 . The continuing decline in population places pressure on Council's ability to fund expected levels of service and new projects while maintaining financial sustainability.

Council currently operates with an annual income of approximately $\$ 30$ million, with a substantial percentage being derived from government grants which are not guaranteed into the future. The graph below shows the sources of council income:

In 2013, the then Division of Local Government appointed New South Wales Treasury Corporation (TCorp) to undertake an assessment of the financial sustainability of all New South Wales councils. The report by TCorp in 2013 which considered both historical financial information and a 10 year financial forecast, determined that Carrathool Shire Council possessed an acceptable capacity to meet its financial commitments in the short to medium term and a limited capacity in the long term. The report suggested that Council may experience difficulty in managing core business risks. TCorp further determined in its analysis that there were no known foreseeable events that would have a direct impact on the financial sustainability of Council.

In September 2015 IPART determined Council to be financially fit for the future as a rural council. Concerns were expressed however due to the prospect of increasing operating expenditure per capita over time combined with a declining population forecast.

In order to continue to meet the needs of current and future residents, Carrathool Shire, the Council must address financial sustainability.

## Improving our Financial Position

Council is committed to achieving the objectives outlined by the Carrathool Shire community in the current Community Strategic Plan - Towards 2032. This includes addressing current goals while undertaking effective planning to meet the requirements desired for the future by our community.

Council is carrying out, and will continue to review, the following initiatives to maximise the ability to provide services.

Improving efficiency of Council operations
Operational efficiencies alone are unlikely to provide the level of additional funding required to maintain financial sustainability while implementing our community's priorities and vision for the future. Council continuously
reviews all areas of operations seeking opportunities to improve Council's financial position through initiatives such as improved project management capabilities, the implementation of systems and processes to streamline operations and a rolling program of service reviews embedded in the Delivery Program.

## Improving asset management

Council currently maintains a large portfolio of assets including one of the most substantial road networks in the state. The responsibility for the operation, maintenance, renewal and upgrade of community assets places a significant burden on Council's budget. The maintenance of a sustainable asset base requires an ongoing program of detailed analysis and, often, difficult decision-making by both Council and the community.

## Review of community expectations \& service levels

Council needs to implement processes to ensure that it is providing services and infrastructure that meets community needs and is within the community's ability to pay.

Increasing state and commonwealth funding

Council needs to continue to aggressively pursue all avenues for both state and commonwealth grants which may improve its position. This includes lobbying local members and government ministers for additional funding.

## Increasing rates revenue

To maintain services at levels expected by the community, Council will utilise various scenarios within the LTFP to explore affordability. Community consultation is a vital consideration as part of this process.

## Measuring Performance

Council will continue to report on and monitor its financial performance based on standard financial indicators:

These indicators include:

- Operating Performance ratio
- Own Source Operating Revenue ratio
- Building and Infrastructure Asset Renewal ratio
- Building and Infrastructure Backlog ratio
- Asset Maintenance ratio
- Debt Service Cover ratio
- Real Operating Expenditure ratio
- Cash Expense Cover ratio

We will also ensure compliance with the accounting and reporting requirements of the Local Government Code of Accounting Practice, including annual auditing of accounts and the provision of information to the community and the Office of Local Government.

## Quarterly Reporting

Performance in regard to Operational Plan budgets will be monitored and reported to Council each quarter. Reports will include budget variations and reviews.

## Annual Reporting

Council will prepare annual reports to the community in accordance with the requirements of the Local Government Act 1993 and the Integrated Planning and Reporting Guidelines. The report will include a summary of financial performance and achievements against delivering the outcomes of both the Operational Plan and the Delivery Program.

## Review of LTFP

The Long Term Financial Plan will be reviewed annually, in conjunction with the review of the Operational Plan and Delivery Program. Financial projections will be revised and updated as required.

## Financial

## Assumptions

Financial sustainability and the need to manage core business risks requires Council to develop a robust a well-considered program in order to demonstrate an ongoing capacity to meet financial commitments in the short, medium and long term.

In developing the LTFP, Council has considered and made assumptions with regard to the demographics of the Shire, projected economic growth, service delivery standards and other identifiable major influences on Council's income streams and expenditure patterns and projects.

Carrathool Shire's estimated population in 2021 was 2,750 . This is estimated to fall to 2,650 by 2031 and to further fall to 2,500 by 2041 - a net decrease of 9.1\%.

Financial modelling has included no change to rates income aside from rate peg impacts.

## Factors applied to revenue \& expenditure

The following assumptions are used as the basis of financial modelling scenarios. These factors reflect a moderate inflation rate due to the unpredictable nature of inflation in the current economic climate. This will be monitored and adjustments made to the LTFP to reflect the impact of any significant variation.

## Revenue Factors

| Revenue | Assumption |
| :--- | :--- |
| IPART rate peg | $3.7 \%$ as announced for 2023/24, increasing to 4.5\% for the years <br> $2024 / 25-2027 / 28$ and returning to a projected $3.5 \%$ for the forward <br> years. |
| Annual charges and user <br> fees | Annual charges are increased in line with the rate peg. User fees and <br> charges have been increased in line with the general index amount. |
| Interest on investments | Interest on investments is assumed at 4.0\% in 2023/24 with no growth <br> forecast over the 10 year period to reflect the current market <br> uncertainty. The timing of capital expenditure will affect Council's <br> investment income. |
| Operating grants <br> contributions | In prior years (with the exception of COVID period stimulation), the <br> Financial Assistance grants and other sources of grant funding have not <br> kept pace with inflation and therefore this model applies a lower inflator <br> to the level of grants and contributions over the life of the plan. |
| Capital grants | An assumption is made that Council will continue to receive capital <br> grants from commonwealth and state sources for roads and bridges <br> within identified grant funding programs. As additional grant funding <br> opportunities arise, they will be brought into the model along with <br> identified capital works. |

## Expenditure Factors

| Expenditure | Assumption |
| :--- | :--- |
| Depreciation | The current depreciation rate for each asset class is assumed to continue <br> over the 10-year term of the model. Depreciation expense will vary <br> dependent on the investment in new assets compared to renewal <br> works. All asset classes will continue to be revalued in a 5-year cycle and <br> as this work is completed, the accuracy of depreciation calculations will <br> improve. |
| Employee Benefits | Movement in employee costs is determined through industry award <br> negotiations and market forces. Award increases of 3.5\% have been <br> factored into the 10-year plan for 2023/24 and 2024/25, falling to 3.0\% <br> in 2025/26 and thereafter reverting to an annual increase of $2.5 \%$. <br> Superannuation guarantee contribution increases of 0.5\% pa have been <br> assumed until a total SG rate of $12 \%$ has been achieved in 2025/26. <br> Factors impacting potential wages volatility include internal and <br> external impacts such as the rising cost of employment, skills shortages, <br> staff turnover, staff attraction and retention, maternity and paternity <br> leave, award increases and changes in service levels. |
| Materials \& Services | The 2023/24 year proposed budget is used as the base year before <br> indexation is applied over the 10 year model. This will be assessed <br> annually to take into consideration inflationary pressures on <br> expenditure. |

## Scenario Modelling

The Long Term Financial Plan is structured around two financial models or 'scenarios'. Included is also a scenario outlining the general fund result only with the modelled changes to rates and grants income as detailed in Scenario One.

The first scenario, known as the Scenario with Business as Usual (Scenario One), models the effect of know changes to existing expectations.

The second, known as the Scenario with Rates/Grants Variation (Scenario Two), is based on historical information up to 2021/22, the 2022/23 adopted budget, the proposed 2023/24 budget with trended forecasts projected to 2032/33.

The General Fund Only scenario forecasts the sustainability of Council without the effect of Council's water and sewer functions.

The LTFP details the assumptions used when compiling each scenario as well as the financial outcomes over a 10 year period. It also identifies the major opportunities and risks associated with each scenario to provide an analysis of the sensitivity of the model to the assumed income variations.

## Scenario with Rates/Grants Variations

The scenario with rates/grants variations (known as Scenario Two), uses 2021/22 actual results, the adopted 2022/23 budget and the 2023/24 proposed budget to forecast a result over the 10 year planning period. The forecasts in this scenario provide a less conservative approach than would ordinarily be taken in future financial forecasting.

The result presents a significantly improved financial position for Council with the operating surplus increasing to $\$ 10.784 \mathrm{~m}$ by $2032 / 33$. This would result in an increase to reserves providing additional potential funds for infrastructure renewal in order to better meet required infrastructure renewal costs in future years.

Financial indicators remain within the benchmarks with the exception of the Own Source Operating Revenue ratio. Council consistently fails to meet this benchmark due to its small rate base and the limited opportunities available to diversify income streams.

## Long Term Financial Plan - CONSOLIDATED with Rates/Grants Variations (Scenario Two)

## Scenario with Business as Usual

This scenario (known as Scenario One), uses more conservative assumptions around the forecasting of income with an assumed rate peg ranging between 3.5\% and 4.5\% for all future years together with an indexation for operational grants of $3 \%$. Data for all funds is shown in the attached models.

The consolidated result at the 10 year mark under this scenario is forecast to be $\$ 3.339 \mathrm{~m}$ compared to $\$ 10.784 \mathrm{~m}$ using Scenario Two.

Smaller cash reserves under this scenario
 provide less scope for expenditure on capital renewals.

| Operating Performance Ratio |  |  |  |  |  |  |  |  |  |  |  |  |
| This ratio measures Council's ability to contain operating expenditure within operating revenue | 24.39\% | 6.29\% | 1.51\% | 4.59\% | 4.99\% | 5.53\% | 6.07\% | 6.53\% | 7.01\% | 7.48\% | 7.96\% | 8.53\% |
| (operating revenue excl. capital grants and contributions - operating expenses) / operating revenue excluding capital grants and contributions |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |
| Own Source Operating Revenue excl. FAGs |  |  |  |  |  |  |  |  |  |  |  |  |
| This ratio measures the level of Council's fiscal flexibility. It is the degree of reliance on external funding sources such as operating grants and contributions. Council's financial flexibility improves the higher the level of its own source revenue | 27.49\% | 37.25\% | 43.01\% | 44.99\% | 45.28\% | 45.58\% | 45.91\% | 46.08\% | 46.27\% | 46.47\% | 46.68\% | 46.68\% |
| Benchmark - Greater than 60\% |  |  |  |  |  |  |  |  |  |  |  |  |

## Building and Asset Renewal Ratio

This ratio indicates the extent to which Council is forecasting to meet its consumption level on assets by renewing or replacing assets

## Infrastructure Backlog Ratio

This ratio shows what proportion the backlog is against total value of infrastructure

## Asset Maintenance Ratio

This ratio shows whether assets are maintained to the current standard

## Debt Service Ratio

This ratio measures the ability to service debt including interest, principa and lease payments

## Real Operating Expenditure

This ratio shows the operating expenditure per capitc

## Cash Expense Cover Ratio

his $r$ tio indicates the number of months Council can continue paring for
This ratio indicates the number of months Councii can

Own Source Operating Revenue incl. FAGs This ratio measures the level of Council's fiscal fiexibility. It is the degree of reliance on externalifunding sources such as operating grants and bility improves the higher the level of

## Own Source Operating Revenue excl. FAGs

 This ratio measures the level of Council's fiscal flexibility. It is the degreeof reliance on external funding sources such as operating grants and of reliance on extermal funding sources such as operating grants and
contributions. Council's financial flexibility improves the higher the level of its own source revenue

## Building and Asset Renewal Ratio

This ratio indicates the extent to which Council is forecasting to meet its consumption level on assets by renewing or replacing assets

Infrastructure Backlog Ratio
This ratio shows what proportion the backlog is against total value of
infrastructure

Asset Maintenance Ratio
This ratio shows whether assets are maintained to the curent standard

## Debt Service Ratio

This ratio measures the ability to service debt including interest, principal Thd lease payments

## Real Operating Expenditure

This ratio shows the operating expenditure per capita

## Cash Expense Cover Ratio

This ratio
its imme This ratio indicates the number of months Council can

## Long Term Financial Plan - WATER FUND (Scenario One)

## Own Source Operating Revenue incl. FAGs

This ratio measures the level of Council's fiscal flexibility. It is the degree f reliance on external funding sources such as operating granis and uncil's tinancial lexibility improves the higher the level of its own source revenue

## Own Source Operating Revenue excl. FAGs

This ratio measures the level of Council's fiscal flexibility. It it the degree
of reliance on external funding sources such as operating grants and of reliance on extermal funding sources such as operating grants and
contributions. Council's financial flexibility improves the higher the level of contributions. Council's financial flexibility improves the higher the level of

## Building and Asset Renewal Ratio

This ratio indicates the extent to which Councilis forecasting to meet its consumption level on assets by renewing or replacing assets

## Infrastructure Backlog Ratio This ratio shows what proportion the <br> this ratio shows what proporiion the backlog is against total value of <br> ifrastructure

Asset Maintenance Ratio
This ratio shows whether assets are maintained to the current standard

## Debt Service Ratio

This ratio measures the ability to service debt including interest, principal and lease payments

## Real Operating Expenditure

This ratio shows the operating expenditure per capita

## Cash Expense Cover Ratio

This ratio indicates the number of months Council can continue paying for
its immediate expenses without addifional cash infliw

## Long Term Financial Plan - SEWER FUND (Scenario One)

## Own Source Operating Revenue incl. FAG

This ratio measures the level of Council's fiscal flexibility. It is the degre freliance on external funding sourcess such as operating grants and

## Own Source Operating Revenue excl. FAG

This ratio measures the level of Council's fiscal flexibility. It is the degree of reliance on external f funding sources such as operating grants and Intributions. Councii's financial flexibility improves the higher the level of
own source revenue

## Building and Asset Renewal Ratio

This ratio indicates the extent to which Councilis forecasting to meet its consumption level on assets by renewing or replacing assets

## Infrastructure Backlog Ratio This ratio shows what proportion th <br> This ratio shows what proportion the backlog is against total value of <br> ifrastructure

Asset Maintenance Ratio
This ratio shows whether assets are maintained to the current standard

## Debt Service Ratio

This ratio measures the ability to service debt including interest, principal. and lease payments

## Real Operating Expenditure

This ratio shows the operating expenditure per capita

## Cash Expense Cover Ratio

This ratio indicates the number of months Council can continue paying for
its immediate expenses without addifional cash infliow
(operating revenue excl. capital grants and contributions - operating expenses) / operating revenue excluding capital grants and contributions

## Scenario for General Fund Only

The General Fund Scenario replicates the Scenario Two with the assumed rates/grants income variations.

The result presents an improved financial position for Council's General Fund with a substantially improved result at the ten year mark.

All financial indicators remain within the benchmarks at the completion of the forecast years except own source operating revenue. Again, Council consistently fails to meet this benchmark due to its small rate base and the
 limited opportunities available to diversify income streams

Long Term Financial Plan - GENERAL FUND ONLY with Rates/Grants Variations (Scenario Two)

## Own Source Operating Revenue excl. FAG

This ratio measures the level of Council's fiscal flexibility. It is the degree of reliance on external funding sources such as operating grants and on own soure Council's financial flexibility improves the higher the level of its own source revenue

## Building and Asset Renewal Ratio

This ratio indicates the extent to which Council is forecasting to meet its consumption level on assets by renewing or replacing assets

## Infrastructure Backlog Ratio

This ratio shows what proportion the backlog is against total value of
infrastucture

## Asset Maintenance Ratio

his ratio shows whether assets are maintained to the current standard

## Debt Service Ratio

bility to service debt including interest, principal and lease payments

## Real Operating Expenditur

This ratio shows the operating expendifure per capitc

## Cash Expense Cover Ratio

This ratio indicares the number of months Council can continue paying for
its immediate expenses without addifional cash inflow
(operating revenue excl. capital grants and contributions- operating expenses) / operating revenue excluding capital grants and contributions

## Conclusion

The sampled scenarios presented both demonstrate continued surpluses for all forward years of the plan. Council historically adopts a conservative approach to financial forecasting and it is proposed that Scenario One be adopted as the default LTFP model.

No efficiency gains have been considered in either model presented as Council expenditures are continuously monitored during each year to ensure that Council, as an organisation, is working effectively and efficiently to provide essential services to the residents and visitors to Carrathool Shire.

Council will review this Long Term Financial Plan annually as part of the development of the annual Operational Plan. The review will include an assessment of the previous year's performance in terms of the accuracy of projections made and the testing of multiple scenarios.

Additionally, evaluation will include reviewing and amending estimates and scenarios to improve the accuracy of the plan over the long term. With each review, Council will continue to monitor its financial performance against the financial sustainability goals and benchmarks and investigate possible corrective actions to achieve and maintain a financially sustainable position.

[^0]:    Benchmark - Greater than 3.0 months
